

Progettazione e produzione di articoli tecnici in materiali termoplastici e dei relativi stampi.

Engineering and production of technical items in thermoplastic materials and relative molds.

COMUNICATO STAMPA TECNARGILLA 2016

Large Format and Digital Applications: the main FM focus at Tecnargilla 2016

Three products line has been expanded with new products that reply to new market needs due to **large format** and **digital applications**:

GREEN BLOW LINE

Green Blow line expands with **new accessories**, including a new **trasversal diffuser** that can reach a size of more than 3 meters !

Come and discover personally the versatility of this new diffuser and **test yourself** the "Air Space" produced.

Moreover, it will be possible to perform, directly during the exhibition, a **cooling simulations** on the basis of your production line details.

HEAVY LINE

The production of increasingly **large tiles** induced us to design and produce a new line of **supports** and **pulleys** in plastic material, that will complete our historic catalogue.

Progettazione e produzione di articoli tecnici in materiali termoplastici e dei relativi stampi.

Engineering and production of technical items in thermoplastic materials and relative molds.

An example of "**Heavy Line**", made entirely with the new products designed to bear heavy weights, will be present in our stand.

CONTAINMENT ROLLER CONVEYORS LINE

A roller conveyor for all need !

The roller conveyors range has been expanded to give a concrete answer to all our customers' need: from **precision** in transportation, to the application at **digital printing machine inlet**, to the tile guide of **large formats**.

Come and **try out** the best roller for your needs !

There will be lots of new,
Don't miss the opportunity to try them !
WE WAIT FOR YOU !!!
